ELSEVIER International Journal of Mass Spectrometry and Ion Processes 154 (1996) 237–239

Subject Index

Analytical techniques
The influence of ion/molecule reactions on the evaluation of ion mobility and diffusion coefficients 25
Anthropogenic noble gases
Release of anthropogenic xenon to the atmosphere: a large-scale isotope dilution 89
Atmospheric ions
Study of the reaction of NO clusters with water using a pickup technique 35

Bond connectivities
In situ collisional dissociation in a selected-ion flow tube: a novel, inexpensive SIFT–CID operation 71
Breath gas analysis
Proton transfer reaction mass spectrometry (PTR-MS): propanol in human breath 61

Cations
In situ collisional dissociation in a selected-ion flow tube: a novel, inexpensive SIFT–CID operation 71
Chemical ionization
High pressure investigations of positive ion/molecule reactions in pure sulfur hexafluoride and in a mixture of sulfur hexafluoride and argon 145
Collision-induced dissociation
In situ collisional dissociation in a selected-ion flow tube: a novel, inexpensive SIFT–CID operation 71
Conformal transformations
Ion trajectories in exactly determined quadrupole fields 43

2,5-Diketopiperazines
The negative ion mass spectra of deprotonated 2,5-diketopiperazines 193
Dinitrogen pentoxide
Electron-impact ionization of dinitrogen pentoxide 203
Drift tubes
The influence of ion/molecule reactions on the evaluation of ion mobility and diffusion coefficients 25

Effusion molecular beam
Calculations of the number of ions generated by crossing of a focused photon beam with an effusion molecular beam 213
Electron ionization
Electron-impact ionization of dinitrogen pentoxide 203
Electrospray ionization
Thermal effects on electrospray ionization ion mobility spectrometry 1

Fragmentation
The negative ion mass spectra of deprotonated 2,5-diketopiperazines 193
FT-ICR
Radiative cooling rate of 9-cyanophenanthrene ions by time-resolved photodissociation thermometry 133

Gamma-ray irradiation
Energy deposition and fragments production resulting from gamma-ray or ion beam irradiation of an ion exchange resin 179

High pressure ion source
Pulsed high pressure mass spectrometry with near-viscous flow ion sampling 15

Infrared radiative cooling
Radiative cooling rate of 9-cyanophenanthrene ions by time-resolved photodissociation thermometry 133
Ion beam irradiation
Energy deposition and fragments production resulting from gamma-ray or ion beam irradiation of an ion exchange resin 179
Ion cooling
Radiative cooling rate of 9-cyanophenanthrene ions by time-resolved photodissociation thermometry 133
Ion exchange resin
Energy deposition and fragments production resulting

from gamma-ray or ion beam irradiation of an ion exchange resin 179
Ion microprobe
The Manchester Isolab 54 ion microprobe 99
Ion mobility and diffusion
The influence of ion/molecule reactions on the evaluation of ion mobility and diffusion coefficients 25
Ion mobility detection
Thermal effects on electrospray ionization ion mobility spectrometry 1
Ion mobility spectrometry
Thermal effects on electrospray ionization ion mobility spectrometry 1
Ion sampling
Pulsed high pressure mass spectrometry with near-viscous flow ion sampling 15
Ion trap
Higher order non-linear resonances in a Paul trap 155
Ion/molecule reaction rate constants
Pulsed high pressure mass spectrometry with near-viscous flow ion sampling 15
Ion/molecule reactions
High pressure investigations of positive ion/molecule reactions in pure sulfur hexafluoride and in a mixture of sulfur hexafluoride and argon 145
The influence of ion/molecule reactions on the evaluation of ion mobility and diffusion coefficients 25
Isolab 54
The Manchester Isolab 54 ion microprobe 99
Isotope dilution
Release of anthropogenic xenon to the atmosphere: a large-scale isotope dilution 89
Isotope ratios
Release of anthropogenic xenon to the atmosphere: a large-scale isotope dilution 89
Isotopes
The Manchester Isolab 54 ion microprobe 99

Labelling (^{2}H and ^{13}C)
The negative ion mass spectra of deprotonated 2,5-diketopiperazines 193
Laplace equation
Ion trajectories in exactly determined quadrupole fields 43
Laser beam profile
Matrix-assisted laser desorption/ionization with nitrogen lasers of different pulse widths 171
Laser pulse width
Matrix-assisted laser desorption/ionization with nitrogen lasers of different pulse widths 171
Liquid chromatography detector
Thermal effects on electrospray ionization ion mobility spectrometry 1

$(M - H)^-$ ions
The negative ion mass spectra of deprotonated 2,5-diketopiperazines 193
MALDI
Matrix-assisted laser desorption/ionization with nitrogen lasers of different pulse widths 171
Metastable decay processes
Study of the reaction of NO clusters with water using a pickup technique 35

Nitric oxide clusters
Study of the reaction of NO clusters with water using a pickup technique 35
Non-linear resonances
Higher order non-linear resonances in a Paul trap 155

Osmium
The Manchester Isolab 54 ion microprobe 99
Oxygen
The Manchester Isolab 54 ion microprobe 99

Paul trap
Higher order non-linear resonances in a Paul trap 155
Photodissociation
Radiative cooling rate of 9-cyanophenanthrene ions by time-resolved photodissociation thermometry 133
Photoionization
Calculations of the number of ions generated by crossing of a focused photon beam with an effusion molecular beam 213
Matrix-assisted laser desorption/ionization with nitrogen lasers of different pulse widths 171
Photon beam
Calculations of the number of ions generated by crossing of a focused photon beam with an effusion molecular beam 213
Pick-up techniques
Study of the reaction of NO clusters with water using a pickup technique 35
Polymer analysis
Thermal effects on electrospray ionization ion mobility spectrometry 1
Propanol concentrations
Proton transfer reaction mass spectrometry (PTR-MS): propanol in human breath 61

Proton transfer reaction mass spectrometry (PTR-MS)
Proton transfer reaction mass spectrometry (PTR-MS): propanol in human breath 61
Pulsed electron beam ion source
Pulsed high pressure mass spectrometry with near-viscous flow ion sampling 15

Quadrupole
Ion trajectories in exactly determined quadrupole fields 43

Rate constants
High pressure investigations of positive ion/molecule reactions in pure sulfur hexafluoride and in a mixture of sulfur hexafluoride and argon 145
Reaction rate coefficients
Proton transfer reaction mass spectrometry (PTR-MS): propanol in human breath 61
Rearrangement
The negative ion mass spectra of deprotonated 2,5-diketopiperazines 193
Relative partial ionization cross-section
Electron-impact ionization of dinitrogen pentoxide 203
Reprocessing activities
Release of anthropogenic xenon to the atmosphere: a large-scale isotope dilution 89
RIMS
The Manchester Isolab 54 ion microprobe 99

Selected-ion flow tube
In situ collisional dissociation in a selected-ion flow tube: a novel, inexpensive SIFT–CID operation 71
SIMS
The Manchester Isolab 54 ion microprobe 99
Sulfur hexafluoride
High pressure investigations of positive ion/molecule reactions in pure sulfur hexafluoride and in a mixture of sulfur hexafluoride and argon 145

Thermometry
Radiative cooling rate of 9-cyanophenanthrene ions by time-resolved photodissociation thermometry 133
Time of flight
Energy deposition and fragments production resulting from gamma-ray or ion beam irradiation of an ion exchange resin 179
Time-of-arrival spectra
The influence of ion/molecule reactions on the evaluation of ion mobility and diffusion coefficients 25
Time-of-flight mass spectrometry
Electron-impact ionization of dinitrogen pentoxide 203

Trajectories
Ion trajectories in exactly determined quadrupole fields 43

Viscous flow
Pulsed high pressure mass spectrometry with near-viscous flow ion sampling 15
